DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-6 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

2. Claims 1-4 and 6 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Independent claims 1 and 6 include the newly recited limitation "wherein as the phase difference increases, the execution rate is made lower, and as the phase difference decreases, the execution rate is made higher". However, the subject matter above was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. On page 8, lines 8-17 of the instant specification states "Here, if phase difference is large, the phase absorption execution rate determining part 24 assigns a large value to the execution rate so that the phase synchronization can be attained at high speed. If the phase difference is small, the phase absorption execution rate determining part 24 assigns a small value to the execution rate so that the phase synchronization can be

10/671,593

Art Unit: 2611

processed at low speed in order to suppress jitter." Therefore, based on the above disclosure, it is the understanding of the Examiner that as the phase difference increases the execution rate is made higher, and as the phase difference decreases, the execution rate is make lower.

Allowable Subject Matter

5. Claim 5 is allowable over prior art references.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
